

## Makerspace Software Account login Error

---

### Localhost Error:

The VCarve Pro - Makerspace Edition requires an online connection to activate the software, and some rare cases can cause a conflict with the Online connection when you go to Activate the software:

### This page isn't working

**localhost** didn't send any data.

ERR\_EMPTY\_RESPONSE

If you get this Error in your Web Browser when attempting to Activate your VCarve Pro - Makerspace Software then another application on your computer is conflicting with this online connection.

Some Phone Applications, such as Horizon Calls can block the required online connection.

Disable the conflicting software temporarily and complete the Online activation of the VCarve Pro - Makerspace Software.
