How do my members use VCarve Pro Makerspace Edition?

Makerspace Clients can use the VCarve Pro - Makerspace software by downloading the free VCarve Pro Trial from the Vectric Website and signing into it with their Makerspace linked account.

Notice: They will need to be registered with your Makerspace before beginning this process.

First they will want to download the Free Trial from here:

Download VCarve Pro Trial

https://www.vectric.com/free-trial/vcarve-pro

and sign up for a Vectric Customer Account on V&Co at the same time with the Sign up form.

Download and install the VCarve Pro Trial as normal and use the **Sign in** in the top right corner to sign into the trial Customer account.

Now the member is setup with the Makerspace Membership on your Organisation

account, they are ready to use the trial to create files to then bring to you for Post Processing and cutting at your Makerspace.
